

# SafeNet™ v4.0

Application Release Notes

2015

## SafeNet™ Solutions

SafeNet™ is the most versatile and user-friendly real-time, cloud-based dispatch application for Motorola's MOTOTRBO® radios.

The purpose of these application release notes is to provide information regarding the enhancements made within version 4.0 of SafeNet™.

## Features & Benefits of Version 4.0

- Live, worldwide Google mapping interface with street-view
- Real-time data from your radio fleet to help lower down-time and increase productivity
- Optimize driver times and routes by monitoring fleet patterns
- Radio system monitoring
- Effective customer service through better communication
- Fleet maintenance monitoring using data from reports
- Insurance premium reductions for incorporating GPS/AVL applications into your business model
- Improved overall communication with Text Messaging and E-mails to radios from one source
- Analytic report data to pinpoint cost saving opportunities
- Reductions in overtime and other operating expenses through new system efficiency
- Simultaneous communication with multiple platforms
- Customization into any language

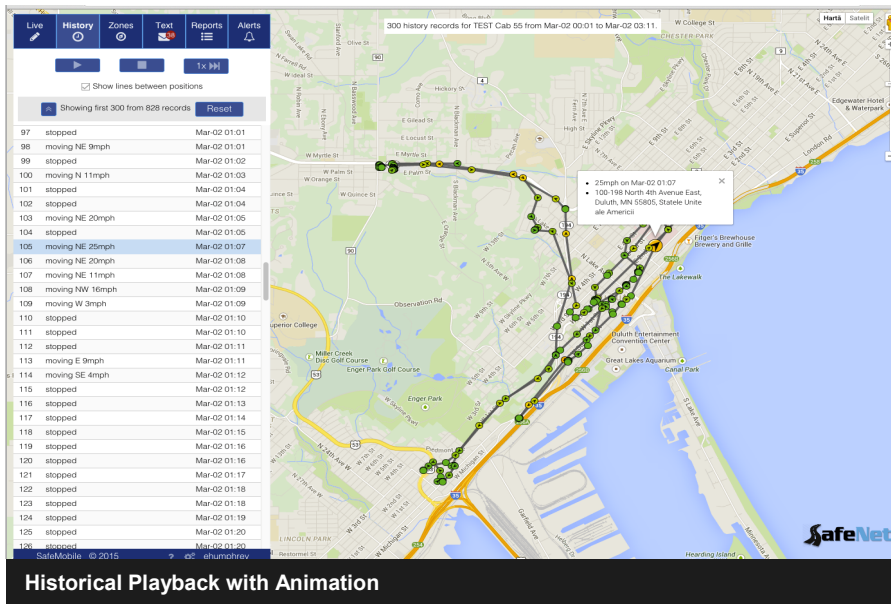

*SafeNet™ is SafeMobile's affordable, entirely web-based, solution to all fleet management needs. From anywhere in the world with an internet connected PC, fleet managers are able to effectively monitor their MOTOTRBO® workforce. When used in conjunction with your radio network, SafeNet™ provides you with invaluable tools to maximize its efficiency, achieve seamless communication and analyze critical data via key reports to get more from your system.*

*Unleash the Power of Your Radios with SafeNet™ 4.0!*

## The SafeNet™ Suite Includes:

- Real-time GPS/ AVL location information with history
- Alerts and Geofences
- Unit status on/ off
- Polling or immediate location reporting
- Emergency notifications
- Time-stamped speed and heading information
- Text Messaging
- E-mail gateway with user-friendly inbox/ outbox
- Intuitive location-based, exportable daily data reports

## Accessible From Anywhere

Accessible from anywhere in the world, wherever you have access to an internet connected PC; SafeNet™ requires no VPN or special hardware.

## Compatible Radio Platforms

- Connect Plus
- Conventional
- IP Site Connect
- Capacity Plus
- Linked Capacity Plus

## Additional Benefits You Can Expect

### No Software Installation Required

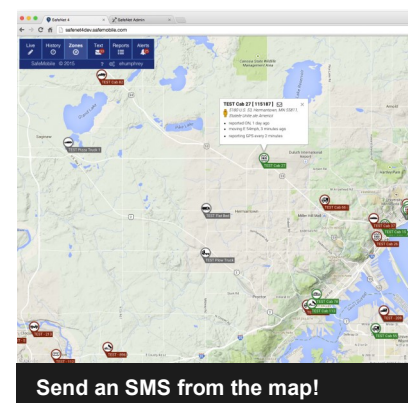

SafeNet™ is entirely web-based via the Cloud and works perfectly with the majority of modern browsers. There is no configuration or maintenance required, ever. Just log in to the provided URL! Our approach to a web-based solution provides an easy, maintenance-free solution. We handle all updates so that you do not have to and updates are always free!

### User-Friendly Interface

Designed with a clean, intuitive interface, SafeNet™ is easy-to-use by anyone who has previous experience working with an internet-based mapping solution, such as Google Maps. The application is also customizable to any language preference you require.

### Affordable

As the most affordable solution on the market, SafeNet™ provides an easy, cost-effective integration of applications with your radios that fits nearly every budget. The benefits of our SafeNet™ features will instantly provide an increase to your productivity and reduce overhead costs for your company that will far outweigh the nominal monthly fee to access the solution.

# Benefits You Can Count On

**Secure Access to Critical Information** - Have secure access to the real-time information you need to make decisions

**Multiple Communication Platforms** - Allows dispatch solutions across multiple radio and cellular platforms

**Secure Data Storage** - Your data is stored on a secure server and is available anytime, from anywhere in the world.

**Instant Dispatch Solution** - A browser, ID and password are all you need to start using your dispatch system

**Customized Solution** - Implement solutions to satisfy your needs

**Hassle-Free Solution** - Limited software installation, no client-server or network maintenance needed

## Markets Served

- Public Safety
- Government
- Transportation
- Utilities
- Industrial
- Mining
- Education
- Hospitality
- Healthcare

SafeNet™ v4.0

**New in SafeNet™ v4.0, Live GPS Status**

### Version 4.0 Improvements

- Updated Live GPS Status—More than six indicators, including inside building/ no GPS, live street view - the view centers on units with each update
- Improved history with animation playback and street view
- Enhanced zone definition and updates: zones can be superimposed on each map type
- Completely revamped messaging interface: see last messages for each unit at-a-glance including their status, focus on individual units and send/ receive messages from the live map, work with group messages, and see desktop notifications even when the application is not visible.
- Optimized Engine: Faster and more robust, easy-to-use and feature rich

### New Features

- Tablet support: native support on application level for Android and iOS in Chrome (7" minimum, recent models - 2 GB RAM)
- Real-time alerts with desktop notifications: See events as they happen, define your own alerts for zones and speeding, get notifications for each event if the app is not visible
- Full Screen Support: minimize the control panel and focus on the map
- Customized User Accounts: Carriers can tailor user accounts according to their needs (add and remove individual features, map can be standalone with no control panel - perfect for dispatch screen panels, read-only displays, etc.)
- Instant Help: Receive quick information on what is in front of you, or jump to the help document when needed

History report for unit: Demo101

Stop Date	Stop Time	Address of (LAT, LON)	Speed (Km/h)
