MANAGED COMMUNICATION SOLUTIONS DESIGNED FOR MOBILE WORKFORCES

With mobile features that include professional PTT calls, live status and GPS mapping, text messaging with file transfer, and worker security alarms which include a wearable employee protective device, called CYRN. LINX simplifies multiple communication and safety technologies into one real-time solution.

What is a complete system without the ability to command and control mobile workers, provision users with individual permissions, dispatch with PC PTT, assign roles and groups, manage mobile device fleets, program devices and update users over-the-air, and monitor your overall operations and efficiency with robust analytics and reporting capabilities? LINX delivers all this and more as a live, feature-rich business solution right to the palm and PC of more than two billion monthly Android users worldwide.

LINX isn't only an alternative to traditional communication, but also a great tool to optimize internal correspondence, business intelligence, and operational work flows for diverse global enterprise and organizations including:

Education· Supply Chain· Transportation/ Tourism· Utilities· Oil and Gas· Mining
Manufacturing· Industrial· Event/Stadium/Campus· Hospitality· Healthcare· Retail
Livery· Public Works· Municipalities· Parks & Rec· Service-Based Businesses
