

CYRN

**CONNECT & PROTECT
YOUR MOBILE WORKFORCE**

WEARABLE HELP BUTTON

HELP IS JUST A CLICK AWAY

The CYRN (pronounced sīrən) SOS button is a wearable professional emergency help button which is ideal for hospitality teams, campus environments, field employees, lone workers, dangerous and hazardous professions, and all workers on the go.

HOW IT WORKS

With the push of the CYRN SOS button, the connected smartphone will send an SOS alert, personalized text message, and the GPS location of the incident to pre-selected contacts.

CYRN can be carried discreetly in a pocket or a bag, worn on the wrist, on a keycard, or around the neck as a pendant. CYRN uses Bluetooth® technology in association with a mobile app on Android or iOS, to initiate calls and text messages from a smartphone.

WHY IT'S IMPORTANT

CYRN ensures that your team members will get help fast if in trouble, even when their phone screens are locked or out of reach.

At the press of a button, your employee will trigger their cell phone to alert emergency staff, safety teams, and management personnel for help and the alert includes their GPS location.

IS YOUR WORKPLACE SAFE?

Workplace violence falls into four categories: Criminal intent, customer/client, worker-on-worker and personal relationship, which overwhelmingly targets women.

HOSPITALITY & LEISURE

390,000 injuries
202 deaths

EDUCATION & HEALTHCARE

830,000 injuries
111 deaths

TRANSPORTATION & WAREHOUSING

260,000 injuries
764 deaths

CONSTRUCTION

310,000 injuries
959 deaths

DID YOU KNOW...

- Work-related injuries totaled 4.5 million in 2016, and total work injury costs were estimated at \$151.1 billion
- The average harassment claim will typically run an organization anywhere from \$75,000-\$125,000

HOW CYRN CAN HELP

ONE-CLICK ACTIVATION

Triggers an SOS Alert via panic button to provide staff the easiest and fastest way to signal for help.

INSTANT SOS MESSAGE

CYRN prompts your smartphone to send an instant SOS text message to up to 5 preset contacts.

GPS LOCATION

Your location will be sent from your smartphone to your pre-defined contacts.

WIRELESS RANGE

CYRN must be within range of up to 75 feet indoors and up to 300 feet outdoors of your smartphone. Buttons play an audio notification if out of range.

PRIVACY PROTECTION

Associates aren't tracked until the panic button is pressed, ensuring privacy while still providing peace of mind.

CYRN BENEFITS

ANDROID & iOS

CYRN works with iPhone 4S/iOS 7 or newer and any smartphone using Android 4.3 or newer with Bluetooth 4.0.

EASY TO USE

The CYRN SOS safety platform is simple, sets up in minutes and is easy to use. The system requires little to no training.

WATERPROOF LIFEPROOF

The CYRN SOS Button is IP67 Compliant. This means it can go in any environment and will work as hard as you do.

NO CHARGING

With up to one year of battery life, CYRN is powered by a standard CR2032 watch battery, which is replaceable by the user.

ALWAYS WITH YOU

CYRN is wearable out of the box with the included wristband or pendant/key chain. Smartphones are not included.

COST EFFECTIVE

CYRN is an inexpensive employee protection solution that can be customized to fit the safety needs of any organization.

CYRN DELIVERS

Higher Morale and Peace of Mind

Boost staff morale and lower workplace anxiety with CYRN wearable panic button that can be discreetly affixed behind an ID badge and quickly engaged to initiate a request for help.

Accelerated Response and Better Job Performance

Increase response times with CYRN's GPS technology and powerful software that lets you know who's in trouble, when and where all in real time to getting help where it needs to go without losing valuable time.

Tools For Your Staff To Get The Job Done

CYRN is built for the mobile worker, who faces unique emergency and non-emergency situations in a dynamic environment. Help them address their work issues more confidently and efficiently.
